

Milwaukee Metro MLS (Wisconsin)

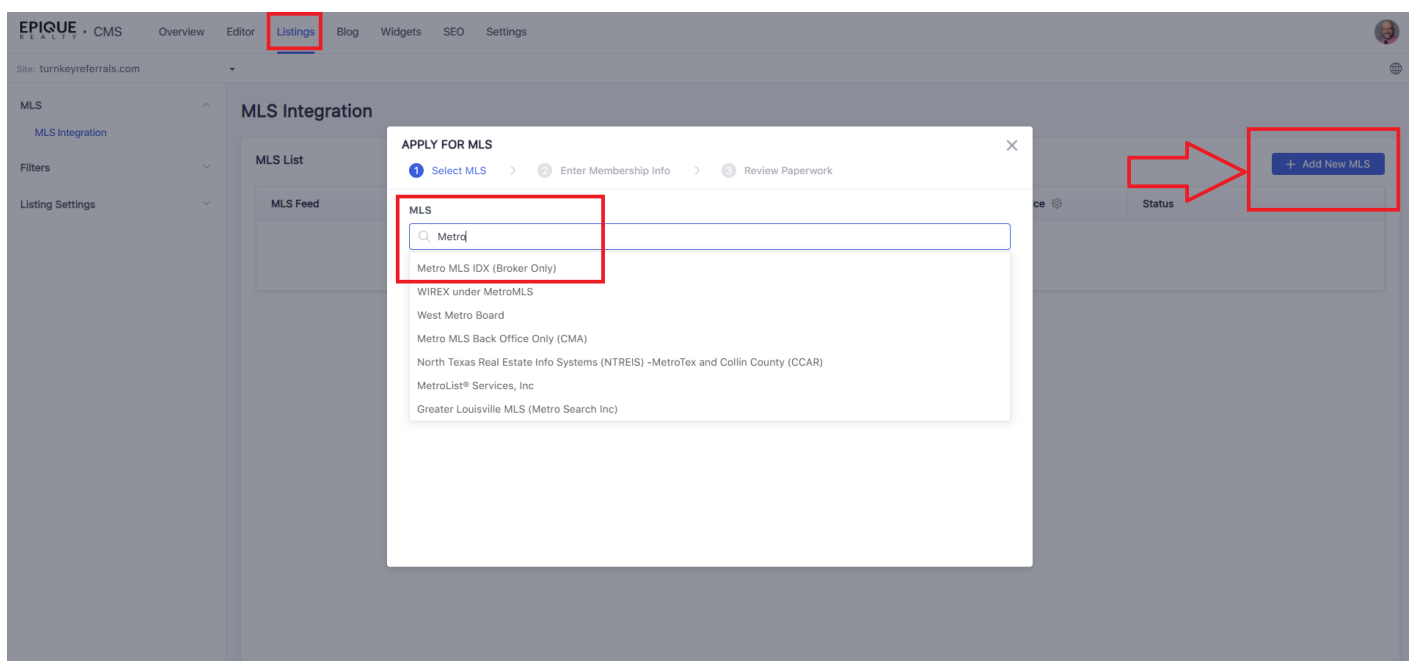

Metro has some strict rules regarding agent websites. This is the streamlined way to get your Lofty connected.

- [MLS IDX Connection Steps](#)

MLS IDX Connection Steps

Due to the strict compliance rules, your site must be upgraded to the Full SEO site in Lofty to have the Metro MLS data feed connected. A custom-compliant template is assigned to the site when you activate your Lofty account. There is no agent charge for this upgrade, as the Full SEO site is an Epique benefit paid for by the brokerage.

In Lofty, click on Website on the top menu, then Listings on the top menu. Click the Add MLS button in the upper right corner. Do a search for Metro MLS and then select the "Metro MLS IDX (Broker Only) option.

Enter your information on the next screen. It will give you a link to go to <https://metromls.com/application-to-frame-a-website/>, which is what you want to do. You are going to "frame" your site from the broker site. What this means is Metro MLS wants the listing display pages to be 100% identical to the broker standard site we have set up. Lofty knows how to handle this, but this is the proper form to use at this link.

For a screen-by-screen walkthrough, use this link here:

https://scribehov.com/viewer/How_To_Add_Metro_MLS_in_Lofty_CRM_Jjgpo2sYQy2iEk5T_UltA?referrer=workspace

This form will require certain information of the brokerage, the vendor (Lofty), and you the agent. Lofty's information is below. A sample of the form properly filled out is at the end of the link workflow above. It's also located at the bottom of this page for reference. The information in red you need to enter for the broker and vendor/consultant sections. The green section is your agent info.

Your Lofty website domain. If using a custom/vanity domain, put that here. If you change your domain after approval, you will need to reapply for this feed per MLS rules.

Your contact information and MLS ID. Make sure this is accurate!
